- Encouragement of paddy cultivation that will increase natural ground water recharging. So Government should support the cultivators for rice cultivation in future.
- Measures are needed for controlling over exploitation of groundwater.
- People need more awareness about importance of rainwater harvesting process.
- Cultivable waste land is increasing so there is need to convert it into cultivable land.
- The availability of Nitrogen is normally low in the panchayath so there is need to increase available Nitrogen through agricultural land use change.
- Moolathara Right Bank Canal is extended to non irrigated area.
